Cesena

September 21, 2018

Romagna has much to be proud of

Romagna has much to be proud of

- great natural beauty

Romagna has much to be proud of

- great natural beauty
- attractive way of life for citizens of region

Romagna has much to be proud of

- great natural beauty
- attractive way of life for citizens of region
- business has done well

Romagna has much to be proud of

- great natural beauty
- attractive way of life for citizens of region
- business has done well
 - by most criteria, Romagna ranks near top of Italian regions business performance

- But, of course, always room for improvement

- But, of course, always room for improvement
- in looking at the EY study, several points emerge

- But, of course, always room for improvement
- in looking at the EY study, several points emerge
 - (1) businesses and entrepreneurs repeatedly complain that can't find enough talent, especially in

- But, of course, always room for improvement
- in looking at the EY study, several points emerge
 - (1) businesses and entrepreneurs repeatedly complain that can't find enough talent, especially in
 - engineering

- But, of course, always room for improvement
- in looking at the EY study, several points emerge
 - (1) businesses and entrepreneurs repeatedly complain that can't find enough talent, especially in
 - engineering
 - data analysis

(2) rate of innovation seems on low side

(2) rate of innovation seems on low side

- plenty of new entrepreneurs

(2) rate of innovation seems on low side

- plenty of new entrepreneurs
 - but invest in more “ traditional” areas

(2) rate of innovation seems on low side

- plenty of new entrepreneurs
 - but invest in more “ traditional” areas
 - not so much in new technologies

(2) rate of innovation seems on low side

- plenty of new entrepreneurs
 - but invest in more “ traditional” areas
 - not so much in new technologies
- relatively little investment by companies in start-ups

(2) rate of innovation seems on low side

- plenty of new entrepreneurs
 - but invest in more “ traditional” areas
 - not so much in new technologies
- relatively little investment by companies in start-ups
- not too much collaboration *across* entrepreneurs

(3) Need for improving the transport system

As an outsider,

As an outsider,

- may be presumptuous to give advice

As an outsider,

- may be presumptuous to give advice
- but let me make a few observations about how societies in other parts of world have dealt with these issues.

(1) *Improving Skills*

(1) *Improving Skills*

- getting students to focus on STEM subjects (*Science, Technology, Engineering, Mathematics*) can be encouraged in secondary school and even primary school

(1) *Improving Skills*

- getting students to focus on STEM subjects (*Science, Technology, Engineering, Mathematics*) can be encouraged in secondary school and even primary school
- by showing that math can be fun

(1) *Improving Skills*

- getting students to focus on STEM subjects (*Science, Technology, Engineering, Mathematics*) can be encouraged in secondary school and even primary school
- by showing that math can be fun
- by teaching STEM subjects in way that satisfies children's natural curiosity

(1) *Improving Skills*

- getting students to focus on STEM subjects (*Science, Technology, Engineering, Mathematics*) can be encouraged in secondary school and even primary school
- by showing that math can be fun
- by teaching STEM subjects in way that satisfies children's natural curiosity
- by attracting good math and science teachers to Romagna schools and retaining them

- study in the U.S. shows that most important factor in determining how schoolchildren do in adult life: *quality of teaching*

- study in the U.S. shows that most important factor in determining how schoolchildren do in adult life: *quality of teaching*
 - having even a single good teacher at critical time can *double* a child's lifetime earnings

- study in the U.S. shows that most important factor in determining how schoolchildren do in adult life: *quality of teaching*
 - having even a single good teacher at critical time can *double* a child's lifetime earnings
 - suggests that teachers should be rewarded according to their *performance*

U.S. tech companies recruit university graduates and encourage university students to study technical subjects

U.S. tech companies recruit university graduates and encourage university students to study technical subjects
–by offering *summer internships*

U.S. tech companies recruit university graduates and encourage university students to study technical subjects

–by offering *summer internships*

- students attracted by *interesting, well-paying* summer jobs

U.S. tech companies recruit university graduates and encourage university students to study technical subjects

–by offering *summer internships*

- students attracted by *interesting, well-paying* summer jobs
- learn valuable skills on job

U.S. tech companies recruit university graduates and encourage university students to study technical subjects

–by offering *summer internships*

- students attracted by *interesting, well-paying* summer jobs
- learn valuable skills on job
- form bond with company and often take permanent jobs after graduation

- Singapore uses contingent scholarships to induce talented students to

- Singapore uses contingent scholarships to induce talented students to
 - study at top foreign universities

- Singapore uses contingent scholarships to induce talented students to
 - study at top foreign universities

- So U.S. companies *recruit* engineers from abroad
 - especially India and Far East
- U.S. gives them special treatment

- U.S. is most technically innovative country in world
 - but doesn't produce enough engineers itself
- So U.S. companies *recruit* engineers from abroad
 - especially India and Far East
- U.S. gives them special treatment
 - special visas

- U.S. is most technically innovative country in world
 - but doesn't produce enough engineers itself
- So U.S. companies *recruit* engineers from abroad
 - especially India and Far East
- U.S. gives them special treatment
 - special visas
 - easy passage to citizenship

(2) Encouraging Innovative Entrepreneurship

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality
 - how to set up a company

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality
 - how to set up a company
- in American universities, close collaboration between business and computer science, biology, and engineering professors

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality
 - how to set up a company
- in American universities, close collaboration between business and computer science, biology, and engineering professors
 - professors are encouraged to create start-ups

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality
 - how to set up a company
- in American universities, close collaboration between business and computer science, biology, and engineering professors
 - professors are encouraged to create start-ups
 - universities offer assistance to startups by investing in them and providing administrative support

(2) *Encouraging Innovative Entrepreneurship*

- leading university in Russia now requires students to study *entrepreneurship*
 - how to take idea and turn it into reality
 - how to set up a company
- in American universities, close collaboration between business and computer science, biology, and engineering professors
 - professors are encouraged to create start-ups
 - universities offer assistance to startups by investing in them and providing administrative support
 - professors allowed to go on leave (or work part-time) for companies

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector
 - too risky

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector
 - too risky
- in China, problem overcome by

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector
 - too risky
- in China, problem overcome by *Public-Private Partnerships*

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector
 - too risky
- in China, problem overcome by *Public-Private Partnerships*
 - government provides much of the financing and/or provides insurance to private partners

- High-payoff but highly uncertain ventures (moonshots) often avoided by private sector
 - too risky
- in China, problem overcome by *Public-Private Partnerships*
 - government provides much of the financing and/or provides insurance to private partners
 - private sector provides the expertise

- Joint ventures between companies have important advantages

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them
 - often improving efficiency

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them
 - often improving efficiency
 - allows partners to insure one another

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them
 - often improving efficiency
 - allows partners to insure one another
 - different partners may have complementary expertise

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them
 - often improving efficiency
 - allows partners to insure one another
 - different partners may have complementary expertise
- China has *required* foreign firms that invest in China to partner with domestic companies

- Joint ventures between companies have important advantages
 - increase scale of activity for each of them
 - often improving efficiency
 - allows partners to insure one another
 - different partners may have complementary expertise
- China has *required* foreign firms that invest in China to partner with domestic companies
 - good opportunity for domestic firms to *learn* from foreign partners

(3) Improving Transportation

(3) Improving Transportation

- would guess that best to develop *public* transportation in Romagna

(3) Improving Transportation

- would guess that best to develop *public* transportation in Romagna
 - more ecologically friendly

(3) Improving Transportation

- would guess that best to develop *public* transportation in Romagna
 - more ecologically friendly
 - high level of traffic fatalities already - - don't want this to go even higher

(3) Improving Transportation

- would guess that best to develop *public* transportation in Romagna
 - more ecologically friendly
 - high level of traffic fatalities already - - don't want this to go even higher
- Public-Private Partnerships in public transport might be answer

- U.K. used to have a fully public railroad system

- U.K. used to have a fully public railroad system
 - British Rail

- U.K. used to have a fully public railroad system
 - British Rail
- now British Rail continues to own and maintain tracks itself

- U.K. used to have a fully public railroad system
 - British Rail
- now British Rail continues to own and maintain tracks itself
 - but private companies own trains and provide services

- U.K. used to have a fully public railroad system
 - British Rail
- now British Rail continues to own and maintain tracks itself
 - but private companies own trains and provide services
 - system creates competition across *different* companies

- U.K. used to have a fully public railroad system
 - British Rail
- now British Rail continues to own and maintain tracks itself
 - but private companies own trains and provide services
 - system creates competition across *different* companies
 - system is generally considered *much* better than old one

I hope some of these experiences might be helpful for Romagna to consider!
